

CLPAX | CLPCX | CLPFX

FUND OBJECTIVE

The Fund's objective is long-term capital appreciation.

INVESTMENT STRATEGY

- The Fund invests at least 80% of its net assets in securities that constitute the NASDAQ-100 Index ("NDX"). The Fund may also invest up to 20% of its assets in futures contracts on the Cboe Volatility Index (the "VIX Index"), options on index Futures, and in cash and cash equivalents, including U.S. Treasury obligations, as a hedge against the Fund's exposure to the NDX.
- The Fund invests in VIX Futures utilizing the same methodology as the Equity Armor Investments VOL 365 trading strategy ("EAVOL Trading Strategy"), a strategy based on a proprietary VIX futures trading strategy that seeks to correlate to VIX futures returns. The EAVOL trading strategy is constructed pursuant to a rules-based volatility analysis that identifies investments that present the least potential for time decay (i.e., the decline in the value of a contract over the passage of time), while maintaining the highest correlation to VIX Index price movement each day.
- The volatility overlay aims to minimize possible losses that are common in stock indexes so that investors might be able to ride-out market swings in pursuit of their long-term investment objectives. The volatility overlay has an associated cost.

The Fund complements NASDAQ-100 Index securities with a distinct volatility hedge overlay that utilizes the same methodology as Equity Armor Investments VOL 365 Trading Strategy.

Growth of \$10,000 Investment: Ending June 30, 2021 Since Strategy Change on October 1, 2020

Performance (%): Ending June 30, 2021¹ Annualized if greater than a year

Share Class/Benchmark	YTD	Since 10/01/20	Previous Strategy

Investors should carefully consider the investment objectives, risks, charges and expenses of the Catalyst Funds. This and other important information about the Fund is contained in the prospectus, which can be obtained by calling 866-447-4228 or at www.CatalystMF.com. The prospectus should be read carefully before investing. The Catalyst Funds are distributed by Northern Lights Distributors, LLC, member FINRA/SIPC. Catalyst Capital Advisors, LLC is not affiliated with Northern Lights Distributors, LLC.

Important Risk Considerations:

Investing in the Fund carries certain risks. The value of the Fund may decrease in response to activities and financial prospects of an individual security in the Fund's portfolio. The performance of the Fund may be subject to substantial short-term changes. There are risks associated with the sale and purchase of call and put options. As a buyer of a put option, the Fund assumes the risk of a rise in the market of an underlying security above the exercise price of the option which will cause a loss of the premium paid for the option. As a seller (writer) of a put option, the Fund will lose money if the value of the security falls below the strike price. Investments in futures contracts involve leverage, which means a small percentage of assets in futures can have a disproportionately large impact on the Fund and the Fund can lose more than the principal amount invested. To the extent the Fund invests in the stocks of Large capitalization companies, the Fund may be subject to additional risks, including the risk of more limited growth potential. Large capitalization companies are more mature compared with smaller capitalization companies and may be less able than smaller sized companies to adapt to changing market conditions. The Fund may be subject to liquidity risk when particular investments of the Fund are difficult to purchase and sell, possibly requiring the Fund to dispose of investments at unfavorable times or prices in order to satisfy obligations. The techniques used to manage volatility of the Fund's investments may not protect against market declines and may also limit the Fund's participation in market gains, especially during periods where the market values are increasing but market volatility is high. These techniques may also increase portfolio transaction costs, which could result in reduced gains or losses. The performance of the Fund is based in part on the prices of one or more of the VIX futures in which the Fund invests. Each of the equity securities held by the Fund and the VIX futures are affected by a variety of factors and may change unpredictably, affecting the value of such equity securities and VIX Futures and, consequently, the value and the market price of the Funds shares.
